InternLink

OJT Internship Management System

Complete System Structure & Feature Guide

1. User Roles & Course Separation

Role	Description	Access Scope
Admin	Full system control, user management, configuration	All courses
OJT Head	Manages student workflow — approvals, monitoring, grading	Assigned course only
Student	Goes through 3 internship stages sequentially	Own internship data

Course Separation Logic: When an OJT Head logs in, they only see students under their assigned course (e.g. BSIT OJT Head sees only BSIT students). This assignment is made by Admin at account creation.

2. Sequential Stage-Gate System

Stage	Gate Condition to Unlock Next Stage
PRE-INTERNSHIP (Stage 1)	All required documents approved + MOA processed + OJT Head clicks Approve Deployment
DURING INTERNSHIP (Stage 2)	Required OJT hours completed + all WARs approved + Certificate of Completion uploaded + Supervisor Evaluation uploaded + OJT Head validates
POST-INTERNSHIP (Stage 3)	Portfolio submitted + OJT Head encodes final grade

3. Authentication & Registration

How Each User Gets an Account

User	Method	Details
Admin	Pre-seeded	Created directly in the database. No registration page.
OJT Head	Admin creates	Admin fills name, email, temp password, and assigned course. OJT Head is prompted to change password on first login.
Student	COR-based self-registration	Student uploads COR (PDF). System scans it, checks for OJT subject, and auto-fills form. Student only sets email and password.

COR Registration Flow

Step	Action
1	Student uploads Certificate of Registration (COR) PDF
2	System scans PDF and extracts: Student Name, Student ID, Course, Year Level
3	System checks if OJT/Practicum subject is enrolled — if not found, registration is blocked
4	Extracted details are auto-filled and locked. Student cannot edit them.
5	Student sets email and password only
6	Account is created and immediately active. Auto-linked to the OJT Head of the same course.

Single Login Page: One login page for all users. System reads the role and redirects to the correct dashboard automatically.

4. Admin Features

Feature	Description
Premade Account	Seeded directly in the database — no registration required
Create OJT Head Account	Manually creates OJT Head account and assigns a course (BSIT, BSCS, BSIS, etc.)
Student Registration	Auto-approved via COR scan — no manual approval needed from Admin
Deactivate / Reactivate Accounts	Can disable or re-enable any user account
Reset Passwords	Can reset passwords for any user in the system
Internship Configuration	Sets required OJT hours, document checklist, and submission deadlines per course
Announcement Management	Posts announcements targeted to specific courses, roles, or all users
System-wide Monitoring	Views all students across all courses and their current internship stage
Reports & Export	Generates summary reports per course, exportable as PDF or CSV

5. OJT Head Features

Note: OJT Head only sees students under their assigned course.

General

Feature	Description
Temp Password on First Login	Prompted to change the admin-assigned temporary password
Course-Filtered Student List	Only sees students tagged under their assigned course
Student Progress Overview	Dashboard showing each student's current stage, hours rendered, and overall status
At-Risk Student Flagging	System auto-flags students who are behind on hours — highlighted for OJT Head

Pre-Internship Tasks

Feature	Description
Document Review	Approve or reject each submitted document with written comments
MOA Status Tracking	Manually updates MOA status (Not Started / In Progress / Processed). Actual MOA drafting is offline.
Deployment Approval	Clicks Approve Deployment to clear the student and unlock Stage 2

During Internship Tasks

Feature	Description
Attendance Monitoring	Views each student's daily time-in/out log, flags missing entries, tracks rendered hours
WAR Review	Approves or rejects Weekly Activity Reports with comments. Student is notified automatically.
Student Monitoring Dashboard	Overview of all active students — on-track vs. at-risk, missing WARs, hours progress
Visit Itinerary Generator	Groups students by company location and generates a visit schedule for company visits
Visit Logging	Records observations, notes, and issues after each company visit
Completion Validation	Validates submitted completion docs and unlocks Stage 3 for the student

Post-Internship Tasks

Feature	Description
Portfolio Review	Reviews completeness and quality of the student's submitted portfolio
Final Grading	Encodes final grade based on attendance, WAR quality, portfolio, and supervisor evaluation form

6. Student Features

General

Feature	Description
COR-Based Registration	Uploads COR PDF — system auto-scans for OJT subject, extracts details, blocks ineligible students
Stage-Gated Dashboard	Clearly shows current active stage and locked upcoming stages
Announcements & Notifications	Receives real-time alerts for document reviews, WAR feedback, stage unlocks, and reminders

Stage 1 — Pre-Internship

Feature	Description
Company Information Form	Submits company name, address, position, and uploads acceptance proof
Document Submission	Uploads each required document individually (medical cert, consent form, resume, endorsement, etc.)
Document Status Tracker	Live checklist showing each document's status: Not Submitted / Pending / Approved / Rejected
Revision Notifications	Gets notified with the OJT Head's comment when a document is rejected
Deployment Status View	Sees current MOA status and deployment approval status while waiting

Stage 2 — During Internship

Feature	Description
Daily Attendance Logging	Logs time-in and time-out each workday
Auto Hours Computation	System automatically calculates rendered hours and remaining hours required
Daily Activity Log	Records daily tasks, accomplishments, and learnings after each workday
WAR Submission	Submits a Weekly Activity Report every week — summary, skills learned, challenges
WAR Status Tracker	Sees approval status of every WAR submitted (Pending / Approved / Rejected)
Progress Dashboard	Hours progress bar, WAR tracker, attendance history all in one view
Automated WAR Reminder	Receives a notification every Friday if WAR has not yet been submitted for the week
Completion Document Upload	Uploads Certificate of Completion and Supervisor Evaluation Form after finishing OJT hours

Stage 3 — Post-Internship

Feature	Description
Portfolio Compilation	Uploads all portfolio components: activity logs, WARs, certificates, resume, final report
Final Submission	Submits complete portfolio package to the OJT Head for final review
Final Grade View	Sees final grade once the OJT Head has encoded it
Internship Completion Badge	Account is marked INTERNSHIP COMPLETED upon final grading

7. System Automations

Automation	Trigger
COR eligibility check	Student uploads COR PDF during registration
Auto-fill registration form	Details extracted from the scanned COR
Stage 2 unlocks	OJT Head clicks Approve Deployment
Stage 3 unlocks	OJT Head validates during-internship completion
Hours auto-calculation	Every time a student logs time-in / time-out
At-risk auto-flag	Student falls behind on hours relative to remaining internship days
Notification: document reviewed	OJT Head approves or rejects a submitted document
Notification: WAR reviewed	OJT Head approves or rejects a WAR submission
WAR reminder notification	Every Friday if WAR has not yet been submitted for that week
Attendance reminder notification	Weekday detected with no attendance log entry from the student
Deployment cleared alert	OJT Head approves deployment — student is notified immediately
Stage completion alert	OJT Head validates a stage — student is notified and next stage unlocks

8. System Scope

INCLUDED	EXCLUDED
■ Student requirement management	■ Company recruitment workflow
■ COR-based eligibility verification	■ Company HR or payroll system
■ Deployment tracking	■ External company logins
■ Daily attendance logging	■ Legal MOA drafting
■ Auto hours computation	■ Dean / Program Chair approvals
■ Weekly Activity Report (WAR)	■ Internal company approval workflows
■ Student monitoring dashboard	■ External business processes
■ Visit itinerary generation	
■ Portfolio compilation	
■ Final grading	
■ Role-based access control	
■ Course-based OJT Head separation	
■ Automated notifications & reminders
